## **TABLES**

1. SEUSSN Report Period Earthquake Catalog Statistics . . . . .	6
---	---

**SEISMICITY OF THE SOUTHEASTERN UNITED STATES DURING 1998** included 107 tectonic (not induced) earthquakes with magnitudes exceeding 2.5 and 15 earthquakes associated with reservoirs. The largest earthquake reported during the year was  $mb(Lg) = 3.9$  occurring on April 13, 1998. The epicenter was in Kershaw County, South Carolina, near McBee.

Figure 1 is an epicenter map of earthquakes located during the report period. Figures 2 and 3 are cumulative epicenter maps for the period from July 1977 through December 1998, covered by SEUSSN Bulletins 1 through 33.

**SOUTHEASTERN U.S. EARTHQUAKES DURING 1998** lists hypocentral parameters, magnitudes, and arrival times for tectonic earthquakes in the southeastern United States.

**SOUTHEASTERN U.S. RESERVOIR ACTIVITY DURING 1998** lists hypocentral parameters, magnitudes, and arrival times for earthquakes near the reservoirs in South Carolina.

**SEISMIC STATION LISTING AND NETWORK MAPS** contains a listing of seismic stations potentially operational during the report period and maps showing the major network operators in the region. The SEUSSN monitoring area is considered to include all of Florida, Georgia, Alabama, South Carolina, North Carolina, Virginia, West Virginia (south of latitude 37.72 deg N), Maryland, and Delaware; and includes Tennessee and Kentucky - east of longitude 87 degrees West (see Figure 4).

**INTERNET ACCESS TO SOUTHEASTERN U.S. EARTHQUAKE CATALOG INFORMATION AND ELECTRONIC VERSIONS OF THE BULLETIN** describes how to download southeastern U.S. earthquake catalogs and electronic versions of the SEUSSN Bulletins via the Virginia Tech Seismological Observatory website <http://www.geol.vt.edu/outreach/vtso>. Hypocentral parameters of events in Bulletin 33 are accessible via the CNSS catalog at <http://quake.geo.berkeley.edu/cnss>.

**DEFINITIONS AND NETWORK OPERATOR CODES** contains definitions of various terms and abbreviations used in the Bulletin as well as a listing of codes for network operators and/or contributors.

#### Acknowledgments

This report is the thirty-third SOUTHEASTERN UNITED STATES SEISMIC NETWORK BULLETIN and covers the period from January through December, 1998. The organizations supplying data for this Bulletin are Auburn University, Charleston Southern University, Delaware Geological Survey, Georgia Institute of Technology, Maryland Geological Survey, Millersville University, United States Geological Survey, University of Florida, University of Memphis (Center for Earthquake Research and Information), University of North Carolina, University of South Carolina, University of Tennessee/Tennessee Valley Authority- Joint Institute for Energy and Environment, Virginia Polytechnic Institute and State University (Virginia Tech Seismological Observatory), and the Westinghouse Savannah River Company.

Several of the plots in this report were generated using the Generic Mapping Tools (GMT) software package developed by Wessel and Smith (1991).

**FIGURE 1.** Epicenters of earthquakes ( $M \geq 0.0$ ) in the southeastern United States for this report period.

**FIGURE 3.** Epicenters of earthquakes ( $M \geq 3.0$ ) in the southeastern United States from July 1977 through this report period.

### SEUSSN EARTHQUAKE CATALOG STATISTICS

**TABLE 1.** SEUSSN Report Period Earthquake Catalog Statistics

<u>Period: January through December 1998 (1 year)</u>	<u>Tectonic</u>
Number of Earthquakes with $M \geq 0.0$	107
Number of Earthquakes with $M \geq 2.0$	50
Number of Earthquakes with $M \geq 3.0$	5
Number of Earthquakes with $M \geq 4.0$	0
Number of Felt Earthquakes	7
Number of Earthquakes with Known ERZ $\leq 5.0$ km	90

Largest Earthquake: 13 April 1998; 09:56 - northeastern SC, mb(Lg)= 3.9, V MM

<u>Period: July 1977 through December 1998 (21.5 years)</u>	<u>Tectonic</u>
Number of Earthquakes with $M \geq 0.0$	1691
Number of Earthquakes with $M \geq 2.0$	646
Number of Earthquakes with $M \geq 3.0$	105
Number of Earthquakes with $M \geq 4.0$	8
Number of Felt Earthquakes	215
Number of Earthquakes with Known ERZ $\leq 5.0$ km	1262

Largest Earthquake: 27 July 1980; 18:52 - Sharpsburg, KY, mb= 5.2, MMI= VII

## SOUTHEASTERN U.S. EARTHQUAKES DURING 1998

Events are listed chronologically (this also applies to multiple hypocenter locations for the same event). All times are Universal Coordinated Time. Most entries in the listing are self-explanatory. Items that might require further explanation are defined in the section entitled DEFINITIONS AND NETWORK OPERATOR CODES.

## SOUTHEASTERN U.S. RESERVOIR ACTIVITY DURING 1998

Events are listed chronologically (this also applies to multiple hypocenter locations for the same event). All times are Universal Coordinated Time. Most entries in the listing are self-explanatory. Items that might require further explanation are defined in the section entitled DEFINITIONS AND NETWORK OPERATOR CODES.

### SEISMIC STATION LISTING AND NETWORK MAPS

Stations potentially operational in the SEUSSN during the report period are listed below. A list of operator code definitions may be found in the section entitled DEFINITIONS AND NETWORK OPERATOR CODES. After the station listing is a plot of all the stations, followed by maps of individual networks (with station identification codes) operated by major member agencies or groups of the SEUSSN.

Sta. Code	Lat. N (Dg-Min)	Lon. W (Dg-Min)	Elev. (M)	Dates Open-Close	Current Operator	Locality

## **INTERNET ACCESS TO SOUTHEASTERN U.S. EARTHQUAKE CATALOG INFORMATION AND ELECTRONIC VERSIONS OF THE BULLETIN**

### Southeastern U. S. Seismic Network Bulletins

Text files of SEUSSN Bulletins No. 1 through 33, are accessible at  
<http://www.geol.vt.edu/outreach/vtso/>.

### Catalog of Southeastern United States Earthquakes

A catalog of pre-instrumental and instrumentally located earthquakes in the southeastern U.S. region is available at <http://www.geol.vt.edu/outreach/vtso>. The catalog is a synthesis of information contained in the U.S. Geological Survey State Seismicity Map Series (Stover, C. W., B. G. Reagor, and S. T. Algermissen, 1984, "United States Earthquake Data File," U.S. Geological Survey Open File Report 84-225) and earthquake hypocenter parameters and magnitudes determined by regional seismic network operators in the region. For the period subsequent to July, 1977, the catalog is composed of data appearing in the SEUSSN Bulletins. An important aspect of the Southeastern U.S. Catalog is the estimation of magnitude for a large number of pre-instrumental shocks in the region. These estimates were derived using the region specific relationships between felt area, maximum intensity, and mb(Lg) magnitude developed by Sibol et al. (Bull. Seism. Soc. Am., 77, 1987, pp. 1635-1654).

The Southeastern U.S. Catalog of earthquakes subsequent to July, 1977, is incorporated into the CNSS Composite Catalog, accessible at <http://quake.geo.berkeley.edu/cnss/>.

## **DEFINITIONS AND NETWORK OPERATOR CODES**

Below are some entries in this Bulletin that might require definition. Also given is a detailed listing of agencies or groups (and their letter codes) that supply information to this Bulletin.

AZM: Azimuthal angle from epicenter to station as measured from north (in deg),

DEP: Focal depth estimate (in km); FXD indicates that the depth was held fixed during the epicentral determination,

DIST (KM) Epicentral distance (in km) between the epicenter and a station,

ERROR ELLIPSE:	Semi-axes, expressed as lengths (km) and azimuths (deg), of the vertical projection of the error ellipsoid (Lahr, 1980). Horizontal axes are expressed as the semi-major axis (ERHMAX), it's azimuth (AZ), and the semi-minor axis (ERHMIN). The vertical axis (ERZ) is the largest vertical deviation of the error ellipsoid from the hypocenter. A quality measure (Q) for the ellipsoid based on the length of the largest semi-axis (ERHMAX, ERHMIN, or ERZ) may also be supplied. For this Bulletin the following statistics apply for error estimates: CERI, UTK, and VTSO: Error ellipse projected semi-axes from HYPOELLIPSE corresponding to a chi-square statistic (68%) with one degree of freedom, GIT: Error ellipse projected semi-axes from LOCA, and USC: Standard error estimates from HYPO71. NEIC and USGS: Unknown,
GAP:	The largest azimuthal separation (in deg) between recording stations,
HYPOELLIPSE:	Computer hypocenter location program (Lahr, 1980),
HYPO71:	Computer hypocenter location program (Lee and Lahr, 1974),
LOCA:	Computer hypocenter location program developed at the Georgia Institute of Technology,
MBN or mb(Lg):	Body wave magnitude determination using Nuttli's formulas for the Lg phase (Nuttli, 1973),
MDB, MDL, MD:	Duration/coda length magnitude that approximates either the mb, ML, or an unknown magnitude scale, respectively. As of June 1986 (SEUSSN Bulletin 17), those using a duration magnitude approximating mb(Lg) are CERI, DGS, GIT, UTK and VTSO. Specifically: CERI: $MDB = -2.36 + 2.23 \log(D) + 0.12 \log(K)$ ( $MDB > 2.6$ ) $MDB = -3.38 + 2.74 \log(D)$ ( $MDB < 2.7$ ) VTSO, UTK, and GIT: $MDB = -3.45 + 2.85 \log(D)$ where D is signal duration measured from the P-wave arrival time to the time when the signal returns to background noise, and K is the epicentral distance in kilometers. Those using a duration magnitude approximating ML are USC and USGS. Specifically: USGS: $MDL = -0.87 + 2.0 \log(D) + 0.0035 X$ where D is signal duration measured from the P-wave arrival time to the time when the signal returns to twice background noise, and X is the epicentral distance in kilometers. For more information please see SEUSSN Bulletin 17 (page 1) or contact the agency making the estimate for details on their specific procedure,
ML:	Local magnitude; contact the agency or group making the estimate for details on their specific procedure,
NO:	Number of P, S, and S-P readings used in locating the event,
PHASE:	Phase descriptions for either P or S waves, or S-P times. Included under this heading may also be the descriptors; 'i' for an impulsive arrival or 'e' for an emergent arrival. Preliminary first motions may also be given for P wave polarities. These include; 'u', 'c', or '+' for a compressional first arrival, and 'd' or '-' for a dilatational first arrival. '?' indicates that the arrival time is questionable.
Q:	Solution quality of the hypocenter (the average of the SQD quality measures, see below; Lee and Lahr, 1974),
RES:	Arrival time residual (the difference between the observed and the calculated arrival time, in seconds). An "X" following the value of the arrival time residual means that the arrival time was not used to compute the location of that event,
RMS:	Root-mean-square of the weighted arrival time residuals (in sec),

- S-P: Difference between the S and P wave arrival times (in sec),
- SQD: Measures of the statistical quality of the solution (S), and of the distribution of stations (D) around the hypocenter (Lee and Lahr, 1974),
- \*XXXX: Code indicating the agency or group that made the hypocentral/magnitude determination; a listing of agencies and groups that operate seismographs in the SEUSSN and/or who supply information to this BULLETIN follows.

#### Operator Codes

AUAL - Auburn University, AL  
 CERI - Center for Earthquake Research and Information, TN (formerly Tennessee Earthquake Information Center, TEIC, changed 7/1/87)  
 CPL - Carolina Power and Light Company, NC  
 CSU - Charleston Southern University, SC (formerly BCC, Baptist College at Charleston-changed 1991)  
 DGS - Delaware Geological Survey, DE  
 DPC - Duke Power Company, SC  
 GIT - Georgia Institute of Technology, GA  
 GSA - Geological Survey of Alabama, AL  
 GSW - Georgia Southwestern College, GA  
 MGS - Maryland Geological Survey, MD  
 MVU - Millersville University, PA  
 NASA - National Aeronautics and Space Administration/Goddard Space Flight Center, WV  
 NEIC - National Earthquake Information Center, USGS, CO  
 SCEG - South Carolina Electric and Gas Company, SC  
 SLU - St. Louis University, MO  
 TCC - Tidewater Community College, VA  
 UFL - University of Florida, FL  
 UNC - University of North Carolina, NC  
 USC - University of South Carolina, SC  
 USGS - United States Geological Survey, CO  
 UTK - University of Tennessee/Tennessee Valley Authority- Joint Institute for Energy and Environment  
 UTM - University of Tennessee at Martin, TN  
 VP - Virginia Power, VA  
 VTSO - Virginia Tech Seismological Observatory, VA  
 VSCC - Volunteer State Community College, TN  
 WAL - Washington and Lee University, VA  
 WSRC - Westinghouse Savannah River Company, SC  
 WVGS - West Virginia Geological and Economic Survey, WV  
 WVU - West Virginia University, WV
